TECH SKILLS

Languages & Frameworks :

- PHP (Laravel), JavaScript (React, AngularJS), Python (FastAPI, Flask), Java, HTML/CSS, C#

AI / Machine Learning :

- LangChain, RAG, RAGAS, Machine Learning, LLM, Groq API

Databases :

- MySQL, PostgreSQL, ChromaDB

Other:

- API REST/GraphQL, Git/GitHub, Postman, UML Modeling

LANGUAGES

- French
- English

PROFILE

TECHNOLOGY ENGINEER IN COMPUTER SCIENCE, GRADUATE OF THE POLYTECHNIC SCHOOL OF DAKAR (ESP), WITH OVER 2 YEARS OF EXPERIENCE IN WEB APPLICATION DEVELOPMENT, RAG ARCHITECTURES, AND ARTIFICIAL INTELLIGENCE. FULL-STACK DEVELOPER AT HTSOFT SENEGAL, PASSIONATE ABOUT DESIGNING INNOVATIVE SOFTWARE SOLUTIONS WITH STRONG BUSINESS IMPACT.

EDUCATION

TECHNOLOGY ENGINEERING DEGREE, Computer Science 2024 - 2026

Polytechnic School of Dakar (ESP), Dakar

- Year 1: Ranked 1st in class (14.88/20)
- Year 2: Ranked 4th in class (15.05/20)

HIGHER TECHNOLOGY DIPLOMA, Computer Science 2022 - 2024

Polytechnic School of Dakar (ESP), Dakar

Baccalaureate - Science Series (S2) 2021 - 2022

Lycée Sergent Malamine Camara

PROFESSIONAL EXPERIENCE

Fullstack Developer – Backend Focus

HTSOFT SENEGAL

November 2024 - Present

- Designed and developed functional modules for several production business applications (procurement-logistics-distribution ERP, HR information system, real estate management)
- Integrated artificial intelligence solutions into existing applications, including an automated CV screening module
- Contributed to UML modeling and technical architecture of several applications, from functional design to deployment

Web Development Intern

HTSOFT SENEGAL

May 2024 - November 2024

- Designed and built an online seminar management platform from scratch using Laravel, from data modeling to delivery
- Led this project independently as part of the final internship required for the Higher Technology Diploma in Computer Science

PROJECTS

SamaVoie — Thesis Project

Hybrid RAG system for academic guidance in Senegal: dense retrieval (BGE-M3) + BM25, RRF fusion, cross-encoder reranking, HyDE, and multi-turn query reformulation. Conversational assistant (Kali) + program recommendation engine.

Technologies: Python, LangChain, ChromaDB, FastAPI, Groq API, React

SIRH (Human Resources Information System)

Contributed to the front-end and back-end development of the HR platform, integrated an AI module for CV pre-screening, developed Laravel APIs, and deployed the application.

Technologies: React, Laravel, Postman, PostgreSQL, OpenAI API

SALAMA (Procurement, Logistics and Distribution Management ERP)

Web application managing a company's full procurement-transport-distribution cycle: tenders and supplier evaluation, transport offer validation workflow, fleet management (vehicles/drivers/shipments by tonnage), warehouses and delivery notes, network of points of sale by zone/province, and tracking of donor-funded programs. Integrates Sage X3, a GraphQL API, Excel/PDF exports, and a roles/permissions system.

Technologies: Laravel, React, Postman, PostgreSQL

GESTIMMO (Real Estate Management ERP)

Developed real estate and financial management modules, generated PDF documents, migrated data, and supported users.

Technologies: Laravel, Blade, AngularJS, Postman, PostgreSQL

N-BaloT - Network Intrusion Classification (Machine Learning)

Designed an IoT intrusion detection system based on machine learning, experimenting with several algorithms (Random Forest, SVM, KNN) and deploying a web interface.

Technologies: Python (Flask)

TamTam FinConnect

Full development of the responsive landing page, design and improvement of user modules, project owner and investor dashboards, and management of opportunity lists. This project strengthened my skills in UI/UX, front-end development, and full system design.

Technologies: HTML, CSS/Tailwind, PHP (Laravel)
